(9) Copy

C.S.

I do not think I can consider the question except as a whole. It seems highly probable that the underground water investigations Committee will recommend an increase in Govt's contribution towards the cost of the boring. The question then arises whether the scheme should have been proceeded with on the absence of specific authority.

at (16a), endorsed by the Chairman at (16),
be approved by the O.A.G.?
T.H. 8/11.

(18)

Treasurer.

The variations of the estimates for the Anehta Village Supply, boring and distribution system, have been of a frequency which does not point to accurate original investigations. However, the position now is: the boring is over and the water supply has been found and now remains ~~for~~ its pumping and distribution. That is now, we hope, finally estimated to cost £1660 and I think that that money should be voted on the conditions mentioned in paragraph 4 of (16). I also consider that a contribution of £600 from the villagers is satisfactory and you will remember that the High Commissioner does not wish Government to insist upon a very high percentage of contribution if the village cannot really afford it.

1500

9.11.34.

Please reply

by 17.11.34

Chief Secretary.

I find it very difficult to support a proposal that a sum of £P.2,990 should be expended on the Village Water Supply of Anehta in the absence of some information that the benefits derived from the scheme justify the large expenditure now proposed. I also think that some explanation is necessary as to the variation in the total cost of the original estimate on which the Village contribution of £P.600 is based. I should like to have some evidence of the ability of the villagers to pay a sum of £P.600, and to know the village source from which that payment will be made. I should also like an assurance that the expenditure of £P.1,330 from the Funds for Underground Water Investigations is in accordance with the scheme approved by you; and I think that you should be satisfied that "the great geological and hydrological informative value of the work" justifies this expenditure, and that the informative value justifies a reduction in the cost of the scheme purely from the economic point of view of the village. I should also like particulars of the estimated revenue and the annual recurrent charges of the scheme.

14.11.34.

un
Treasurer.

(20)

ACS To see (19) in reply to
your minute at (18).

This matter must be brought to finality quickly. It seems to me clear that Govt. cannot now demand a larger contribution than the £P600 promised from the villagers, & that the scheme having been begun must be completed.

I submit that the quickest method of reaching

a decision is for the C.S. to interview the D.M.S., D.P.W. & T.

[v. also W/120/34.]

6/12

16.11.34

(21)

C.S.

I recommend that a conference be held as proposed in (20) to bring this matter to finality. The sum of money involved is large but I do not think Government can go back now on what is virtually a promise to the village.

The D.M.S. has asked me to hasten the matter as much as possible.

(As regards file W/120/34 which Mr. Evans mentions, the Treasurer has asked for information which I think it is reasonable to call for from the Committee and I am doing so. A conference is not required on that paper.)

18-11-34.

10/11

(22)

The cost of the bore can properly be debited to underground water investigations. It has produced information of real value as showing that the water-table struck at Tulkarem passes through Amatha at precisely the same depth. This information, I am informed, is considered to be of great value by the Govt. Geologists.

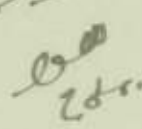

Mr. Foot assured me that the village wd. find the balance of the sum of L.P. 600 promised. L.P. 300 has already been collected & is on deposit. I had a long talk with the leading villagers (who subsequently lunched with me) & was much impressed with his force of character, ^{intelligence} & drive. I am told that he rules the

village by a house of benevolent desolation.
He is young & a substantial landowner. He
assured me both that the outstanding £300 wd.
be produced & also that there wd. be no
difficulty in collecting a water rate sufficient
to meet all recurrent charges.

I shall discuss on Thursday with Treasurer
& D.M.S. after the latter's estimates have been
taken in Committee. I shall be grateful
if D.M.S. will then produce the estimate of
revenue & recurrent expenditure asked for by Treasurer
in (20).

 17/11/34.

(19)
D.M.S.

Please see
the list for approval
of (22) for incorporation
and submission of
estimate as in (19)

28.11.

(69)

Mr Shaw

The continued failure of the Arable scheme is becoming a scandal. I don't think it is any use referring to D.P.W. again. We shall only get the

usual report that repairs
have been effected & we may
then confidently await the
D.C.'s report of a further breakdown.

To a layman these seem
to be some radical defects
in the pumping machinery &
having regard to the sum
which has been expended,
a thorough enquiry seems
justified. An enquiry would
be better carried out by the
Village Water Supplies Committee
which originally needed the
scheme.

∴ letter to be appd.

C.L.E.

18.8.57

(70)

1. Personally I entirely agree with (69) and
the action proposed. The Chairman of the V.W.S.C. is
the D.M.S. and the D.P.W. is represented on the Ctee.

2. But what we propose to do is likely to be
regarded by the D.P.W., I fear, as a serious affront
to his Department; not that that, per se, is any
reason why we should not do it.

Recopy the letter opposite as slightly amended for
submission to the C.S. for signature, if approved.

Mr. Shaw.

[Signature]
25/8

No need to send letter. We discussed and I spoke to
Mr. Kenniff about this supply. He tells me that the
supply has been working continuously since the
beginning of this month. They had left the job to a
contractor previously. On this occasion the P.W.D.
made the pump themselves and think it is a good job
and that water will flow continuously.

Please inform D.C.w/r to his diary extract. Ask
him to report again separately as to whether the
supply is now satisfactory.

(76)

By ACS

After what Mr Kennell
told the C.S. at (72), it is
a little surprising to find
the pump breaking down
again less than 3 months
later. I see the P.W.D. have
a new excuse this time.
The supply of excuses like
the water will soon begin
to run dry.

Reamination apart,
the responsibility for repairs
is finally on the shoulders
of Govt. v. (74) & in the crisis
there is no alternative to
sanctioning the arrangements
proposed in (75).

? As proposed.

Chief Secretary.

It appears that the original pump installed under this scheme was unsuitable for the purpose and it has been found necessary to replace it. It would appear therefore that, as the original scheme was faulty, the cost of overcoming that fault should be charged to the vote from which the cost of the original scheme was met, namely "Underground Water Investigations". Unfortunately the Director of Public Works has already overspent the vote and I have pointed this out in my letter No.301/6 dated 15th January, 1938. It is thus not possible to charge the cost of the new pumps to the vote provided under the Loan Schedule for Underground Water Investigations.

2. It seems, further, that the fault lay with the Director of Public Works in installing an unsuitable pump and I doubt whether it would be either possible or fair to require the villagers to pay any further sum to rectify the fault. The villagers have already provided a sum of £P.600 as a contribution towards the cost of the scheme.

3. But in any case the installation cost of £P.200 for which application for special warrant is now made does not represent the whole cost of rectifying the fault in the present pump. The Director of Public Works proposes to utilise a pump in stock which he has already purchased from his vote for Plant and Equipment under Head XXVIII. That pump must have a value, and I do not consider that the Director of Public Works should be permitted to transfer the plant without charge. The Director of Public Works further proposes to purchase an auxiliary pump and to charge the cost to

Head XXVIII, Item 109 "Plant and Equipment". I do not think this course is warranted as the pump is not required for departmental purposes.

4. In my letter No.301/6 of the 15th instant I have advised that the Director of Public Works be instructed to furnish a complete statement of the position in regard to the vote for Underground Water Investigations. Until this statement is furnished I am unable to advise as to the incidence of charge of the work now required at Anebta; but supplementary funds would appear to be necessary and they should cover the cost of the two pumps and of their installation. Credit should be given to "Sale of Departmental Stores" for the pump in stock with the Department of Public Works.

15.1.38.

J. N. Adams
Treasurer.

(83)

Letter from Treasurer - 15.1.38
Anebta Water Supply Scheme.

(84)

The Treasurer, (Mr Johnson),

1. (82) and (83) will be pursued as requisite and as quickly as possible.

2. But may I in the meantime ask if you will be so good as to endorse the Special Warrant asked for at (80)? This expenditure was approved by the Chief Secretary personally: see his initials following minute (79) and we are unescapably committed to it. If I am not mistaken, the questions raised by (82) and (83) may take

months to settle. In the meantime the village of Anehta is without water: see (81). Whether or not the P.W.D. has committed accountancy irregularities, I am sure you will agree that it is most undesirable and derogatory to Government that a community should remain without water, which Government is under a moral liability to supply in the circumstances, while we proceed with a departmental argument as to those irregularities and the responsibility for them.

3. I shall be most grateful for an early reply.

M. W.

for C.S., 25. 1. 38.

(85)

C.S.

The Treasurer has endorsed the

(85)

Special warrant in the sum of £200 but as reported in my ^{minute} letter to you of the 15th inst. (82) the actual sum required is not £200 but that sum plus the cost of the pumps.

2. When the D.W. has straightened matters out he should apply for additional funds.

19 MAY 1934 19

Enclosures Subject Village Water Supply - Anebta Village,
Tulkarem Sub-District.

Chief Secretary,
Government Offices,
Jerusalem.

The recommendations of the Sub-Committee in connection with the improvement of the water supply for the village of Anebta, Tulkarem Sub-District, include the provision for the installation of an engine and pump and reservoir at an estimated cost of £P.600.

2. The Committee after careful consideration of the scheme, wish to recommend that the sum of £P.600 be granted in this case. In this connexion it should be noted that when the scheme is put into effect, it will also benefit several of the surrounding villages.

3. The villagers concerned are prepared to give the necessary undertaking to repay 50% of the cost, and the scheme would not be put in hand until such an undertaking had been given.

4. The village will, it is recommended, also bear 50% of the cost of the successful boring for water, estimated by the Director of Public Works at £P.600. Repayments will, therefore, amount to £P.600.

*Then 25th

[Signature]
CHAIRMAN,
VILLAGE WATER SUPPLY
COMMITTEE.

W/80/34

August, 1937.

Chairman,
Village Water Supplies Committee.

Subject: Anebta Water Supply.

I am directed to refer to correspondence ending with my letter No. W/80/34 of the 8th December, 1934, on the subject of the provision of funds for the installation of a permanent water supply at Anebta, and to transmit for your information a copy of an extract from the July report of the District Commissioner, Northern District, regarding the failure of the pump and engine.

Enclosure

2. This water supply has been the subject of constant complaint and correspondence for it appears never to have been in working order for more than short periods at a time since its completion.

3. It is clearly most unsatisfactory that so expensive a scheme should have proved so defective, and I am accordingly to request that the Village Water Supplies Committee will cause to be made - possibly through the medium of a small sub-committee - a thorough examination of the supply at an early date with the objects of ascertaining the causes of its failure, making recommendations for its improvement and apportioning responsibility for its defects.

CHIEF SECRETARY.

Copy to District Commissioner, Northern District.
Director of Public Works.

Extract from District Commissioner,
Northern District's Monthly Report
for July 1937 dated 4-8-37 on CF/58/37.

29. Anebta water supply. I reported last month that the pump and engine at Anebta were repaired and that the supply was again in working order. The pump has now again broken down and the villagers have almost given up hope of ever having a regular supply of water again. Except for a few days the plant has been out of order for the past eighteen months. Its story is briefly: (taken from my Monthly Report for September 1935) (dated 6th October 1935)

Date begun	-	16-9-33
Date water found	-	9-5-34
Date water supplied	-	not yet
Cost to Government		LR 1,389.

W/80/34.

24 May, 1934.

Chairman,
Village Water Supply Committee.

Subject : Village Water Supply -
Anebta Village, Tulkarm
Sub-District.

Reference: Your letter No.106/66 of
the 19th May, 1934.

I am directed to approve the
grant of the sum of LP 600 for the improve-
ment of the water supply of the village of
Anebta, Tulkarm Sub-District.

8/33/32

Enclosures..... Subject Village Water Supply, Permanent
Schemes - Anebta Village, Tulkarem
Sub-District.

Reference:- Your W/80/34 of 24-5-34.

Chief Secretary,
Government Offices,
Jerusalem.

① When this scheme was recommended to you -
vide my 106/66 of 19-5-34 - it was estimated that
the cost would be £P.600 plus £P.600 being the
estimated cost of the boring, and the villagers
were prepared to refund 50% of the total cost, that
is to say, they were prepared to refund an amount
of £P.600.

2. However, since your approval of the scheme,
the estimates have been revised as follows:-

- | | |
|--|-----------------|
| (a) Boring has cost | £P.1200. |
| (b) Installation of water-plant, i.e.
pump & engine, construction of
reservoir and installation of
supply pipe etc. | £P. 900. |
| | ----- |
| | Total:-£P.2100. |

3. At the meeting held on Friday last, the 14th
instant, the scheme was reconsidered in the light
of the revised estimates. It was decided that the
cost of the boring operations and the amount of
any contribution by the villagers for this portion
of the work was not a matter for consideration by
this Committee but one that should be dealt with by
the Underground Water Resources Committee.

4. As regards the actual water supply installation,
the District Commissioner is of the opinion that the
villagers are not in a position to contribute more

than the £P.300 for which they have already given an undertaking. Therefore, having regard to para 3 of your letter No. W/209/33 dated 2-8-34, the Committee recommend that the scheme be proceeded with at a cost of £P.900 and that the villagers should be required to refund one third of that amount, namely £P.300.

5. You have already approved £P.600 for this portion of the scheme, your authority is therefore requested for a further grant of £P.300, making a total of £P.900.

J.W. Hurler

GOVERNMENT OF PALESTINE.

DISTRICT OFFICES.
NABLUS.

18th. September, 1934.

Chief Secretary,
Jerusalem

Subject:- Anebta Water Supply.

Reference. Your letter No. G/33/32
dated the 10th September,
1934.

Water was found in Anebta in May of this year. A scheme for the installation of a pump and engine and for piping of the water to a central reservoir above the village, from which several stand-pipes at various points in the village would be supplied, was prepared by the Department of Public Works and a recommendation was submitted to the Village Water Supplies Committee that the scheme, which was estimated to cost £P.600, should be approved for execution.

2. On the 29th May the recommendation was approved on condition that the villagers undertook to repay half the cost of the scheme i.e. £P.300. Such an undertaking was obtained from the villagers.

3. At the end of July the Assistant District Commissioner, Samaria, was informed by the Engineer, i/c Nablus that a detailed estimate of the proposed work had been prepared and that the cost of the work was estimated to be £P.900.

4. In view of the difficulty which had been experienced in obtaining the undertaking from the villagers to repay £P.300 it was considered undesirable to approach them again to obtain an undertaking to repay a greater amount and as the villagers had already paid £P.300 towards the cost of boring operations it was considered that a greater contribution to the cost of the distribution scheme was beyond their means.

5. The Village Water Supplies Committee was consequently requested to recommend to Government that the revised scheme (estimated to cost £P.900) should be approved on condition that the villagers should repay £P.300 only, the remainder of the cost being met from Government funds. The Committee agreed on the 14th September to make such a recommendation.

6. If the Committee's recommendation is approved and if there is no delay in starting work on the distribution system it should be possible to complete the whole work this year (as the installation of the pump has already been put in hand).

On the instruction of the Acting District Commissioner I am sending this letter direct to you.

ASSISTANT DISTRICT COMMISSIONER
SAMARIA.

GOVERNMENT OF PALESTINE,
PUBLIC WORKS DEPARTMENT,
JERUSALEM.

October 21, 1934.

Chief Secretary.

Subject:- Anebta Boring and Water Supply.

(1)

I have to report that the total cost of the boring at Anebta, inclusive of all casing, is LP.1,330.000 mils, and in view of the great geological and hydrological informative value of this work, I would recommend that this expenditure be debited entirely to Underground Water Investigations, and I understand that the village of Anebta cannot afford to pay more than 50% of the proposed works described hereunder.

not as usual. see (2) (3)

Further to this, in order to relieve the drilling rig from this site a 15 m³ pump was purchased locally and installed at a total cost of LP.430.000 mils, also to enable pumping to continue a 15 HP engine is being loaned to the work from the P.W.D.

(3)

In order to complete this scheme I have in mind the following alternative proposals :-

1. Installation of pumping plant including pump already installed and low level reservoir; water to be hand carried by consumers.
 - (a) Purchase of pump 15 m³ p.h. LP. 280.000 mils
 - (b) Installation of pump by P.W.D. 150.000
 - (c) Purchase of 26 HP engine through Crown Agents 300.000
 - (d) Installation of 26 HP engine by P.W.D. 30.000
 - (e) Pump House 100.000
 - (f) Low level reservoir 20 m³ 50.000
- LP. 910.000 mils

or

2. Installation as in Alternative 1 but with distribution scheme, water being piped to within access of the houses.

(a) Items a,b,c,d, & e in 1	LP. 860.000 mils
(b) High level reservoir	100.000
(c) Distribution system	<u>700.000</u>
	<u>LP.1,660.000 mils</u>

(4)

It is understood that the contribution of the village for the first alternative would LP.455.000 mils and for the second alternative LP.830.000 mils, but it is considered that a substantial reduction may be made in items b and c of the second alternative if full advantage is taken of the Village Roads and Works Ordinance and I will address you further upon these alternative proposals when I have received the remarks of the departments concerned.

Lancelotti Pindsey.

✓ Chief Secretary,
Government Offices,
Jerusalem. ✓

(13) 160
This scheme was reconsidered by the
Committee at the meeting held on the 29th
October, 1934, in the light of Director of
Public Works' letter to you No. 5/4/12 of
21-10-34, and District Commissioner, Northern
District's letter to Director of Public Works
No. 216/47 of 24-10-34, a copy of which is
attached.

3
2. The sum of £P.600 has already been
authorized for this scheme - vide your letter
No. W/80/34 of 24 May, 1934, but the Director
of Public Works reports that the boring had
cost £P.1330 and that this expenditure will
be debited entirely to the funds for Underground
Water Investigation, but that to complete the
scheme a further sum of £P.1060, in addition
to the £P.600 already authorized, making a
total of £P.1660, will be required. The total
cost of the scheme will, therefore, be:-

- (a) For boring..... £P.1330.
(b) Other work to complete
water installation etc..... £P.1660.

Total:- £P.2990.
=====

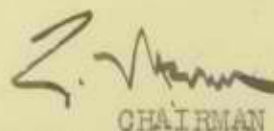

of which the villagers will refund £P.600, that is to say the total cost to Government of the complete scheme will be £P.2390.

3. The Committee were of the opinion that if Government expends £P.2390 on this project, some arrangements should be made to provide water to other villages and also that funds be set aside for maintenance and renewals etc. This could be done by making small charges for water supplied to the inhabitants of Anebta and also for water supplied to outsiders.

4. The Committee, therefore, recommend that a further sum of £P.1060 be approved for the completion of this scheme on the understanding that a responsible Local Water Committee be constituted, the members of which should include Government representatives, to undertake the administration and management of the water supply system. Such Committee to be empowered to fix the rates to be paid for water by inhabitants of Anebta and for outsiders.

In connection with the foregoing, please see minute 7 of the minutes of the meeting held on the 29th October, 1934, copy of which has been sent to you.

5. As the completion of this scheme has been outstanding for a considerable time, I beg to request that the matter may now be treated as urgent, as it is essential that the work of completion should be put in hand without further delay if it is to be completed this year.

CHAIRMAN

VILLAGE WATER SUPPLY COMMITTEE.

Copy to:- Director of Public Works.
District Commissioner, Northern District.
Asst. District Commissioner, Samaria.

G2F.

24th October, 1934.Director of Public Works,
Jerusalem.

Subject:- Anebta Boring and Water Supply.
Reference:- Your 5/4/12 of 21-10-34 to Chief
Secretary with copy to me.

I support your recommendation that the total cost of the boring operations should be borne by Government and I would add to your argument in support of this proposal that the villagers were never asked to agree to contribute anything towards the cost of the boring when boring started or during the time when boring was in progress.

2. I am in favour of the second alternative scheme referred to in your letter firstly because it is desirable to encourage the villagers to obtain clean water from the bore rather than to use dirtier water from their cisterns (which are scattered throughout the village and which would be used in the earlier part of the summer in preference to the new supply if it were necessary to carry water from a reservoir near the bore-hole to their houses), and secondly because it was only when they understood that Government contemplated carrying out a distribution scheme in the village that the villagers agreed to contribute a total amount of £P.600.

3. With regard to the question of the amount to be contributed by the villagers towards the scheme I consider that they should not be asked to repay more than £P.600 which is the amount which they have already undertaken to find. It should be remembered that an undertaking to repay £P.600 was obtained from the villagers only after considerable difficulties and it would, in my opinion, be undesirable to return to the villagers now in order to ask

for an increase in the amount of their undertaking. In any event they would almost certainly be unwilling to agree to pay more than £P.600 agreed upon.

4. I therefore recommend that Government should at once put in hand the scheme now estimated to cost £P.1660 and that villagers should be required to repay only £P.600.

5. The suggestion in the last paragraph of your letter that the cost of building the reservoir and of laying the distribution pipes might be reduced if village labour were employed might be suitably dealt with by the Asst. District Commissioner Samaria in consultation with the Engineer i/c Nablus but I recommend that the starting of work on the scheme should not be further delayed for this or any other reason. The Asst. District Commissioner will attempt to arrange for free village labour to be provided but it must be remembered that ploughing, which is now in progress, is occupying most of the labourers in the village and that it would be a hardship at this season to take many of the villagers from their ploughing in order to make them work in the village.

6. It should be remembered that water was found in Anebta in May and that the scheme which you have now submitted has been under consideration for nearly six months. It is essential that the work should now be put in hand with the least possible delay.

No. W/80/34.

Chief Secretary,
Government Offices,
Jerusalem.

Exp. f. 180 p. a.

As stated before the Estimates Committee
on November 22nd, the maintenance cost of the
Water Supply at Anebta including mechanic's
wages, fuel, repairs, has been estimated by the
District Engineer at £P.15 per mensem.

2. The Assistant District Commissioner
informed me that it is proposed to levy a water
rate at 10 mils per head of the population per
mensem.

Rev. call
f 207 p. a.

3. The population is about 1700 so that
the revenue would more than cover expenditure.
He insisted that the people were quite prepared
to pay this rate, and also the capital sum of
£P.600, provided they had a pipe distributed
supply, i.e. the major scheme costing £P.1660.

Date	Reference No.	Description
5.12.34.	S/39/1.	Extract from District Commissioner's Monthly Report for November to the Chief Secretary: (para 43)

Northern District.

43. Work proceeds slowly on a number of village water supplies and the villagers have this year, in a number of cases, been quick to criticise the work done.

The work of Anebta is still under consideration and the men who were working on the installation of a pump have now left the village. No engine has yet been produced. As month after month of discussion and delay pass by, the villagers become exasperated and fed up and it is^a difficult and depressing task to have to attempt to explain to them why it takes over half a year before a final decision is taken and the job is got on with.

Extract from Monthly Report for September, 1935, by the
District Commissioner, Northern District,
original in CF/22/35.

x x x x x x x x x

35. In Anebta the scheme is still not working. The facts
are as follows :

Sept., 1933.	Date begun.
May, 1934.	Water found by Government boring plant. General rejoicings. Dances, speeches, telegrams.
May, 1934.	Scheme for installation of pump, building of reservoir and distribution system esti- mated by P.W.D. to cost LP. 600. Approved by Village Water Supplies Committee.
July, 1934.	New estimate of LP. 900 submitted by P.W.D. Village Water Supplies Committee informed of new estimate.
October, 1934.	New estimate of LP. 1660 submitted by P.W.D. Village Water Supplies Committee informed of new estimate.
December, 1934.	Scheme estimated to cost LP. 1660 approved by Chief Secretary.
September, 1935.	Work completed and test carried out. Pump found to be defective.

Result: No water !

Do we give up hope? No!

W/80/34.

12 October, 1935.

Director of Public Works.

33
I am directed to refer to the correspondence ending with my letter No. W/80/34 dated the 31st December, 1934 and to inquire whether the Anehta village water supply scheme is as yet a going concern in working order? Government's most recent information is to the effect that the scheme was completed and tested last month when the pump was discovered to be defective. If this is so, I am to express the hope that the pump has now been put in order, or at least that very early action will be taken to make it function properly.

From Rafiq Hamdallah, Secretary of
Water Commission.

To

W/80/34

HIGH COMMISSIONER FOR PALESTINE,
TRANS-JORDAN.

Despatched

Tulkarem, 12.10.36.

Received

GPP. 1017-5000-15.6.36

No.

The water of Anebta, your permanent gift,
ceased to flow about six months ago. A word
from Your Excellency will restore the water to
its course.

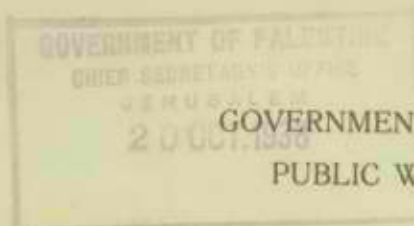

*This is rather
naïf, considering
that for about that
period Anebta was
the centre of one of
the most disturbed
areas in the country!
The strike officially
ended on the 12.10.36.*

59
Subject : Anebta Water Supply.

Reference: Your No.W/80/34 of 20.11.36.

This supply was in operation during the earlier months of the year, but in April a mechanical breakdown occurred which was repaired and the supply functioned until the end of May.

for 52
2. On May 30th the supply again broke down and in view of the disturbances it was not possible to send men to Anebta to investigate the cause and to effect repairs.

3. With the calling off of the strike immediate arrangements were made to meet the contractor on site to investigate the cause of the breakdown. When the casing, together with the pump, were withdrawn from the well it was discovered the piston in the pump had fractured, and due to the ^{jamming} ~~jamming~~ of loose parts the overhead gear had been stripped from its ^{base} ~~base~~. Whether the piston fractured as the result of undue strain due to possibly foreign matter entering the pump, or for any other reason cannot be established, but to endeavour to avoid such an occurrence in future the piston is being redesigned and strengthened.

4. The contractor agreed to carry out modifications to the overhead gear, and to the piston in the

pump, his proposals were received on the 18th instant and I have already written him, stating the work to be done, and requesting him to put the matter in hand with the least possible delay.

W/80/34

December 13, 1937.

Chief Secretary.

Subject:- Anebta Water Supply.

I have to inform you that it was reported to me that the pump at the above supply had broken down on 12th November. Examination of the cause of failure showed that the pump rods had broken.

2. The pump installed at this well is of local design and manufacture and was installed at a time when no pumps of British make were available in the country. It has been a source of constant trouble ever since it was installed and has broken down on several occasions, with consequent dislocation of the supply and expense on repairs.

3. The supply to Anebta Village has been paid for partly by the village and partly from Government funds, and there now exists an obligation for Government to ensure continuity of supply. This cannot be guaranteed with the existing pump.

4. I have available a pump of British make which was purchased in 1936/37 as a charge against XXVIII Public Works Extraordinary, item 114 Plant and Equipment as part of Departmental Plant for use in connection with village water supplies etc.

This pump will be suitable to deliver water from a depth of 450 feet to ground level and by installing an auxiliary pump of British manufacture which can be obtained immediately from stock in Palestine water can then be delivered to the reservoir at a higher elevation.

5. Your formal authority is requested for the following action :-

- (a) Installation of the pump already purchased against Head XXVIII, item 144.
- (b) The local purchase of the auxiliary pump for which funds can be made available under Head XXVIII, item 109 Plant and Equipment at an estimated cost of LP.135.
- (c) The issue of a Special Warrant for LP.200 equivalent savings being met from Head XXV item 16 Maintenance of Plant and Machinery, to meet the cost of dismantling the present pump, transport and erection of the new unit.

In reply please quote
No. 01/6

15th January, 1938.

Chief Secretary.

Subject : Anebta Water Supply Scheme.

In connection with the Anebta Water Supply Scheme which is dealt with on your file W/80/34, I have to report that I have discovered an apparent irregularity in the account of the Underground Water Investigations.

2. In my note at (35a) on your file W/64/36 I informed you of earlier irregularities in regard to this matter. As a result of the situation there disclosed certain adjustments were made in this office which were communicated to the Director of Public Works.

3. In June 1936 the Director of Public Works submitted a statement of completed bores under the Underground Water Investigations Scheme. Item 4 of that statement showed that the Anebta bore was completed on the 9th May, 1934, at a cost of £P.1,388.755 mils. The statement attached to my note under reference showed the cost to be £P.1,454.569 mils. The latter figure was accepted as the figure of final cost on the Director of Public Works' statement ~~and~~ that all work in connection with the scheme had been completed. I am now informed, however, that a further sum of £P.274.266 mils has since been spent on this scheme, thus bringing the cost to £P.1,728.835 mils.

W/64/36
with D/P.W.
14/12/37

Presumably (86) on 11
W 64/36

4. A sum of £P.22,000 is included for Underground Water Investigations in the schedule to the projected new Government loan. A sum of £P.17,362 had been expended at the 31st March, 1937. I am informed by the Department of Public Works that a further sum of £P.5,255 has been expended in 1937-38, thus making a total expenditure of £P.22,617 which is £P.617 in excess of the loan provision. I find it difficult to understand how the Director of Public Works has been able to expend this money in the absence of the necessary financial provision.

5. I shall be obliged if the Director of Public Works may be asked to furnish you with an explanation of his action in overspending the approved financial provision for works in respect of Underground Water Investigations. He should be asked to furnish a complete statement of expenditure to date, showing the works undertaken and the amounts expended on them, commitments in respect of works in hand and the estimated cost of any other works that he may be contemplating.

A. D. Adams.

Secretary of State to High Commissioner No. of

NOTE: (1) A copy of the application must be attached to this Warrant.
(2) To be issued in quadruplicate. A copy will be retained by the Chief Secretary, and a copy sent to the Treasurer, the Auditor, and the Head of Department concerned.

W/80/34

8 February, 1938.

Director of
Public Works.

80 I am directed to refer to your letter No.5/4/12 of the 20th December, 1937, on the subject of the provision of a sum of LP 200 for the purpose of effecting certain improvements to the pumping installations of the Anebta Water Supply, and to inform you that while the requisite Special Warrant in this amount has issued, this expenditure does not appear to represent the aggregate cost of rectifying the faults in the existing plant. In 75 your letter No.5/4/12 of the 13th December, 1937 you intimated that the proposal was to instal a pump already purchased against Head XXVIII, item 144 of the Estimates, together with an auxiliary pump, purchased locally with funds allocated under the same head and sub-head.

I am advised that, since neither pump is required for departmental purposes, it appears to be inappropriate to charge the above mentioned vote with the cost of these pumps. It therefore follows that further supplementary provision for the Anebta water supply will be required, in order that the necessary adjustment in accounts may be effected. In this case, credit would be given to the 'Sale of Departmental Stores' for the pump which your Department already had in stock.

2. I am to take this opportunity to intimate that, according to a statement furnished by the Director of

Public Works in June 1936, the Anehta water supply was completed in May, 1934, at a cost of LR 1,388.755 mils. Further examination of the accounts, however, showed that the actual expenditure amounted to LR 1,454.569 mils. It has since become evident, however, that - at the time of the submission of the Special Warrant for LR 200 to which allusion has been made above - the expenditure on the scheme had amounted to LR 1,728.835 mils. Further elucidation of the finances of the scheme would therefore be appreciated.

3. In my minute No.36 of the 25th August, 1937 on this office's file No.W/64/36, I requested your observations on a note and draft despatch on the financial position of the underground water supply scheme in general, and am now to request that you will use every endeavour to expedite the settlement of the question. It is further requested that, in furnishing your observations, you will include specific reference to the following aspect of the question.

As you are aware, a sum of LR 22,000 was inserted in the schedule to the projected Government loan for Underground Water Supplies. It is understood that, of this total, a sum of LR 17,362 had been expended by the 31st March, 1937; and that additional expenditure amounting to LR 5,255 has been expended in 1937-38. It is thus apparent that the total allocation has been exceeded by LR 617; and it is not understood on what authority this amount has been expended in the absence of the necessary financial provision.

4. It is requested that your observations on the above-mentioned expenditure and on the question in general be accompanied by a complete statement of expenditure to

date/

date, showing the works undertaken and the amounts expended on them, commitments in respect of works in hand and the estimated cost of any other works that are contemplated.

5/4/12.

GOVERNMENT OF PALESTINE. 102
PUBLIC WORKS DEPARTMENT.
JERUSALEM.

May 10th, 1938

Chief Secretary,

Subject : Anebta Water Supply. 90

Reference: Your W/80/34 of 8.2.1938.

Referring to para 2 of your above mentioned
letter :-

- (a) Although it was anticipated, in June 1936, that well had been drilled to the total depth necessary - all casing left in the well had not at that time been debited - this explains the difference between the total cost of LP.1,383.755 reported in June 1936 and LP.1,454.569 at 31.12.1936.
- (b) Casing was not carried to the full depth of the bore, since it was anticipated that the lower strata would stand without support, but it was subsequently found, during pumping operations, that the well had not been cased to a sufficient depth with the result that caving occurred and the pump was blocked. Under the circumstances it was considered necessary to withdraw the pump - deepen the bore a further 11 feet and to insert additional casing bringing the total cost of the well to LP.1,729.645. This is considered a correct charge to Underground Water Investigations.

2. I agree with the statement in para 1 of your letter under reference that, since the two pumps in question will be definitely and permanently tied up with the supply of water to Anebta, their cost should not be met from the votes of this Department for "Plant and Equipment".

The cost of the pump purchased in 1936-37 was LP.276.182.
" " " " " " " " 1937-38 " " 135.000.

Total LP.411.182.

Since both these pumps have been purchased and paid for, a Special Warrant for LP.411.182 should be issued to cover cost and revenue will be credited with a corresponding amount under "Sale of Departmental Stores".

3. During the process of extracting the damaged pump, difficulties arose which necessitated the transport to site of a well rig in order to withdraw pump and casing - the cost of this work, amounting to LP.120, has been temporarily met from Head XXVIII Item 117 Underground Water Investigations.

It was not possible to foresee these difficulties when applying for the Special Warrant for LP.200 and it is not therefore possible to meet the resulting expenditure from these funds. In order to regularise this matter an additional Special Warrant will be necessary for which savings can be shown under XXVIII Item 117. since the rig employed on Anehta Water Supply will necessarily be employed for a shorter period on Underground Water Investigations.

4. During the operations described in para 3 a certain amount of casing was recovered, to the value of LP.53 after allowing for depreciation. Since the insertion of this casing was originally met from the vote for Underground Water Investigations, Extraordinary, credit will have to be given to this vote and the summary of financial position is as follows :-

Expenditure to June 1936	LP.1,383.755
Additional casing left in bore as per para 1(a)	" <u>70.814</u>
Total expenditure to 31.12.1936	" 1,454.569
Additional boring and casing as per para 1(b)	" <u>275.076</u>
Total expenditure to 31.3.1938.	" 1,729.645
Less credit for recovered casing as per para (4)	" <u>53.000</u>
Total expenditure to date, met from Underground Water Investigations.	LP.1,676.645 =====

3.

Cost of 2 pumps as per para 2	LP. 411.182	New Special Warrant required with equivalent credit to revenue. 89
Cost of installation of above.	" 200.000	Special Warrant No. 409 of 29.1.38 issued with saving under "Maintenance of Plant & Machinery"
Additional cost of extracting old pump as per para (3)	" <u>120.000</u>	New Special Warrant required with equivalent saving under "Underground Water Investigations".
Total	<u>LP. 731.182</u>	

Your authority is now requested to apply for a Special Warrant for $LP.411.182 + LP.120 = LP.531.182$ with a saving of LP.120 against "Underground Water Investigations" and a credit to revenue of LP.411.182 for "Sale of Departmental Stores".

W. Hedley
for DIRECTOR OF PUBLIC WORKS.
